

Improved inventory availability

through various storage strategies

Through a strategic storage partnership, PFSCM **improves stock availability** and increases the volume of pooled-procured products. This strategy drives down product costs, virtually eliminates stock-outs, and brings affordable and scalable patient-level storage solutions to some of the most challenging environments on earth.

We help develop and strengthen in-country supply chains by:

- ▶ **Collaborating with our modular storage specialist** to quickly and affordably erect a diverse and custom range of pharmaceutical-compliant storage units in hard-to-reach locations.
- ▶ **Assisting public health programs,** governments, and countries in developing the infrastructure needed to safely and compliantly store lifesaving commodities.
- ▶ **Developing storage facilities** close to the point of care to reduce transport cost and ease inventory management.
- ▶ Using **regional distribution centers** in Eastern, Western, and Southern Africa to pool inventory demand thereby preventing stockouts, reducing pressure on overburdened country-level supply chains, and securing freight savings.

Our clients benefit from:

Fast and affordable storage

Modular storage units can be up to 30% cheaper to erect and 60% faster to install when compared to conventional constructions methods.

Scalable modular storage units

Modular units are scalable and can easily be expanded and reconfigured as the needs of the client or community change.

Professional teams, durable construction

PFSCM's dedicated subcontractor boasts extensive experience in designing, transporting, installing, and maintaining a wide variety of modular storage units.

Improved in-country infrastructure

Storage units take pressure off Central Medical Stores, major storage hubs, and regional distribution centers. This prevents common public health supply chain challenges.

PFSCM's Quality Management System has been certified to ISO 9001:2015 Quality Management System Standard by UL DQS Inc. Ref Registration # 10012936 QM15

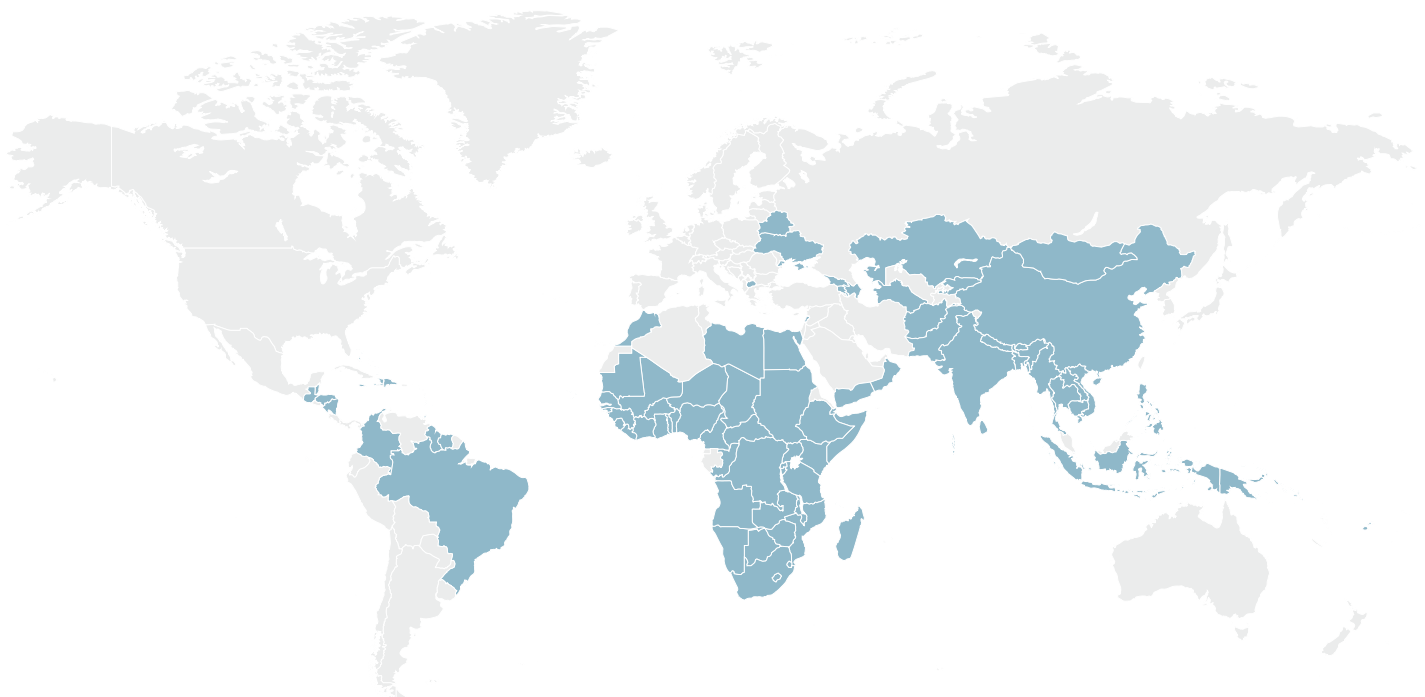

Our Mission

PFSCM strengthens, develops, and manages secure, reliable, cost-effective, and sustainable global supply chains to improve the lives of people in low- and middle-income countries.

Our Partnerships

PFSCM partners with donors, governments, NGOs, and pharmaceutical companies to develop and manage supply chains. Our partners and clients include the Global Fund to Fight AIDS, Tuberculosis and Malaria; the US Agency for International Development; Save the Children Myanmar; the governments of the Dominican Republic and Malawi; Gilead; Janssen; and the Elizabeth Glaser Pediatric AIDS Foundation. PFSCM is also a member of the Partnership for Quality Medical Donations (PQMD).

Our Impact

IN 2017
84%

of deliveries of products to fight HIV and malaria were made on time and in full (OTIF)

MORE THAN
\$5.55 billion

in lifesaving commodities delivered to 101 countries since 2005

ONLY
0.02%

commodity losses thanks to our rigorous security and quality assurance measures

MORE THAN
\$175 million

saved for clients through shipment planning to maximize ocean and road freight and minimize air freight

About Us

Founded in 2005, PFSCM is a nonprofit alliance comprising two organizations that operate and strengthen humanitarian and commercial global supply chains: JSI Research & Training Institute, Inc. (JSI) and Management Sciences for Health (MSH).
