

10 SUSTAINABILITY FACTS ABOUT PFSCM

Established in 2005

UN GLOBAL COMPACT

We are a member of the UN Global Compact. We have consciously reworked our processes and procedures to support sustainable development goals. We routinely inspect our practices to advance the UN Global Compact Principles.

EQUITY, DIVERSITY AND INCLUSION

People are our most important asset. Through our policies and practices we are creating a workplace that is diverse, inclusive and free of discrimination. We are dedicated to understanding and improving the wellbeing of our staff.

QUALITY

Our Quality Management System is ISO 9001:2015 certified, our Product Quality Assurance policy is the backbone of our sourcing operations, and our Risk- and Incident Management approaches enable us to understand and mitigate risks.

REPUTABLE SUPPLIERS

When selecting suppliers we take social, ethical and environmental performance factors into consideration. Our aim is to build lasting relationships with suppliers who share our values in caring for the environment and people.

SUSTAINABLE SOURCING

We ensure products offered to clients are affordable, fit-for-purpose, compatible, lasting and easy to maintain in the long-term. We work with suppliers who offer competitive installation, training and maintenance services.

LOCAL SOURCING

Through our Supplier Prequalification Program we develop sources of supply closer to demand thereby reducing supply chain costs, and minimizing logistics emissions. Local sourcing also uplifts local economies.

LOAD OPTIMIZATION

We use our Load Optimization tool to ensure our suppliers and 3PLs are using cargo space optimally. The tool flags large volume and value orders for packing review; this often reveals opportunities to reduce waste and save costs.

SHIPMENT PLANNING

We take a tailored approach to planning for shipments. Shipments are evaluated and may be staggered, split, consolidated or re-palletized to ensure the most economical and environment friendly solutions are pursued within reasonable lead times.

LOGISTICS EMISSION

We support the Global Logistics Emissions Council (GLEC) framework, and work with 3PLs who have joined the partnership to calculate and report on their logistics emissions. We aim to move our health products via shippers who embrace emission reducing techniques.

EVIDENCE-BASED DECISION MAKING

We employ Evidence-Based Decision Making (EBDM) to ensure our business decisions are based on facts and not feelings. Through our supply chain Control Tower we have the data visibility needed to make sound decisions.
