About PFSCM

The Partnership for Supply Chain Management (PFSCM) is a nonprofit supply chain solutions provider and procurement services agent specializing in prevention, diagnostic and treatment products for the following disease groups and health areas: COVID-19; HIV/AIDS, malaria, and tuberculosis; reproductive health, family planning and, maternal and child health, as well as antimicrobial resistance and harm reduction.

We offer complete sourcing, supply chain, and 4PL solutions including: vendor prequalification and audits, dossier reviews, product sampling and quality testing, forecasting, demand planning, last-mile logistics, real-time shipment tracking, and storage and warehousing.

It is our mission to strengthen, develop, and manage secure, reliable, cost-effective, and sustainable global and local supply chains to improve the health and well-being of people in low- and middle-income countries through increased access to quality and affordable health products.

Impact

PFSCM has access to over 300 reputable manufacturers and their authorized distributors worldwide. Across all clients and products, in the last ten years,* we managed the procurement of more than \$6.6 billion worth of health products for 121 countries; and delivered 37,154 shipments.

Quality Management System

PFSCM is well known for our uncompromising quality standards, from the products we source and procure, to the systems and processes we deploy to meet our clients' requirements.

Our Quality Management System is ISO 9001:2015 certified. ISO 9001:2015 QMS certification provides PFSCM's current and new clients with the assurance that PFSCM's business is conducted within a standardized framework, with documented process methodology, competent staff, and defined roles, as well as an understanding of client requirements.

**Jan 1, 2012 to August 15, 2022*

Product Quality Assurance

We implement policies that protect our staff, and clients, as well as the health care workers and patients who make use of the health care products we procure. By upholding a strict Product Quality Assurance (QA) Policy, we ensure that products we buy are quality tested, safe, fit-for-use, and maintain their integrity during shipping.

PFSCM only procures products that comply with defined quality requirements as prescribed in applicable QA policies, such as those that are prequalified by the World Health Organization (WHO), approved by a stringent regulatory authority or the International Medical Device Regulatory Forum; and meet national regulatory requirements.

We use a multi-tiered risk-based approach to flag and select products for sampling and quality control testing to ensure that the products continue to meet required specifications.

PFSCM's Quality Management Unit also manages an innovative prequalification program. Through this program manufacturers, suppliers and distributors are prequalified and audited to improve their compliance with the WHO's Model for Quality Assurance System for Procurement Agencies Guideline (MQAS), current Good Manufacturing Practices (cGMP) and current Good Distribution Practices (cGDP), where applicable. Through this effort PFSCM is expanding the pool of reliable local sources bringing life-saving commodities closer to communities in need, and building self-reliant supply chains.

Supply Chain Best Practices

PFSCM has an obligation to ensure that products shipped to countries have the highest probability of being consumed. This means products must be as per client specification, must have adequate shelf life, and correct labelling that adheres to country language requirements.

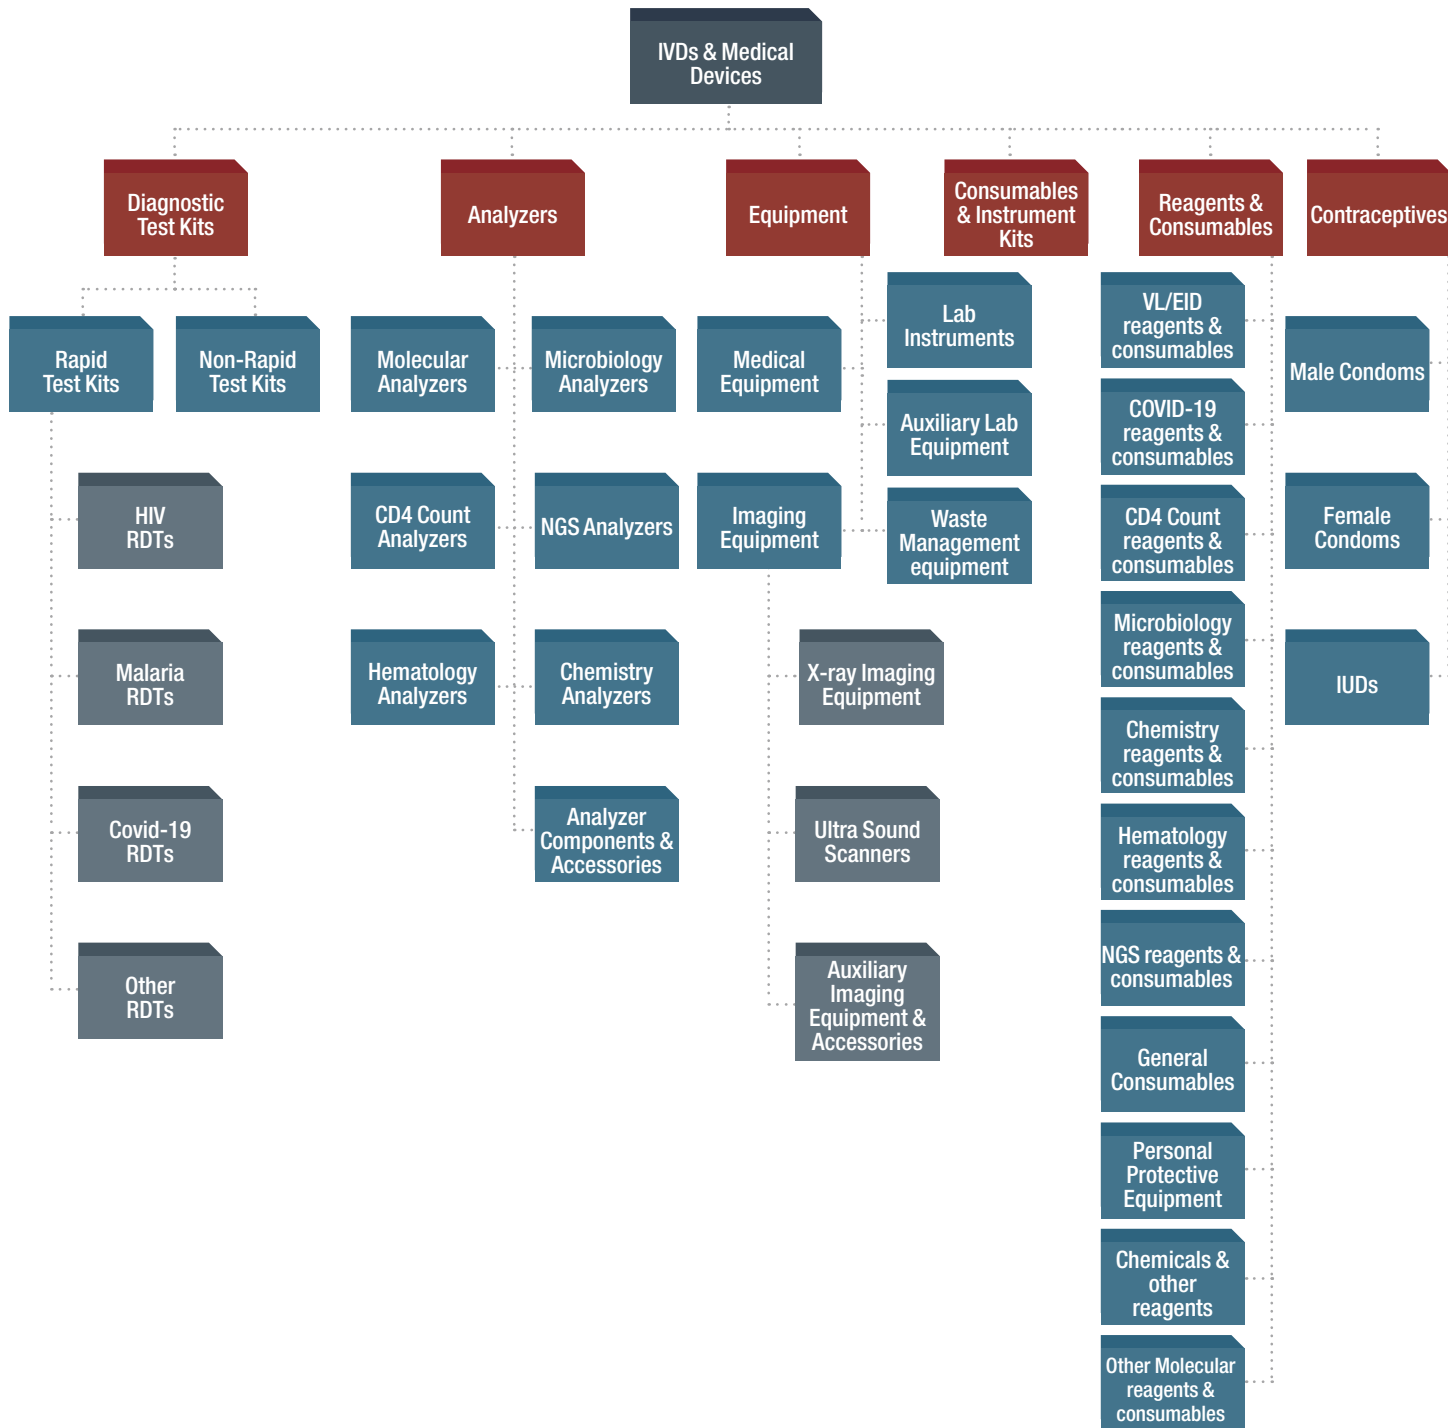

About the Product Catalog

This version of PFSCM's Product Catalog focuses on diagnostics, reagents, consumables, equipment, medical devices and personal protective equipment, and only includes a selection of health products that we supply.

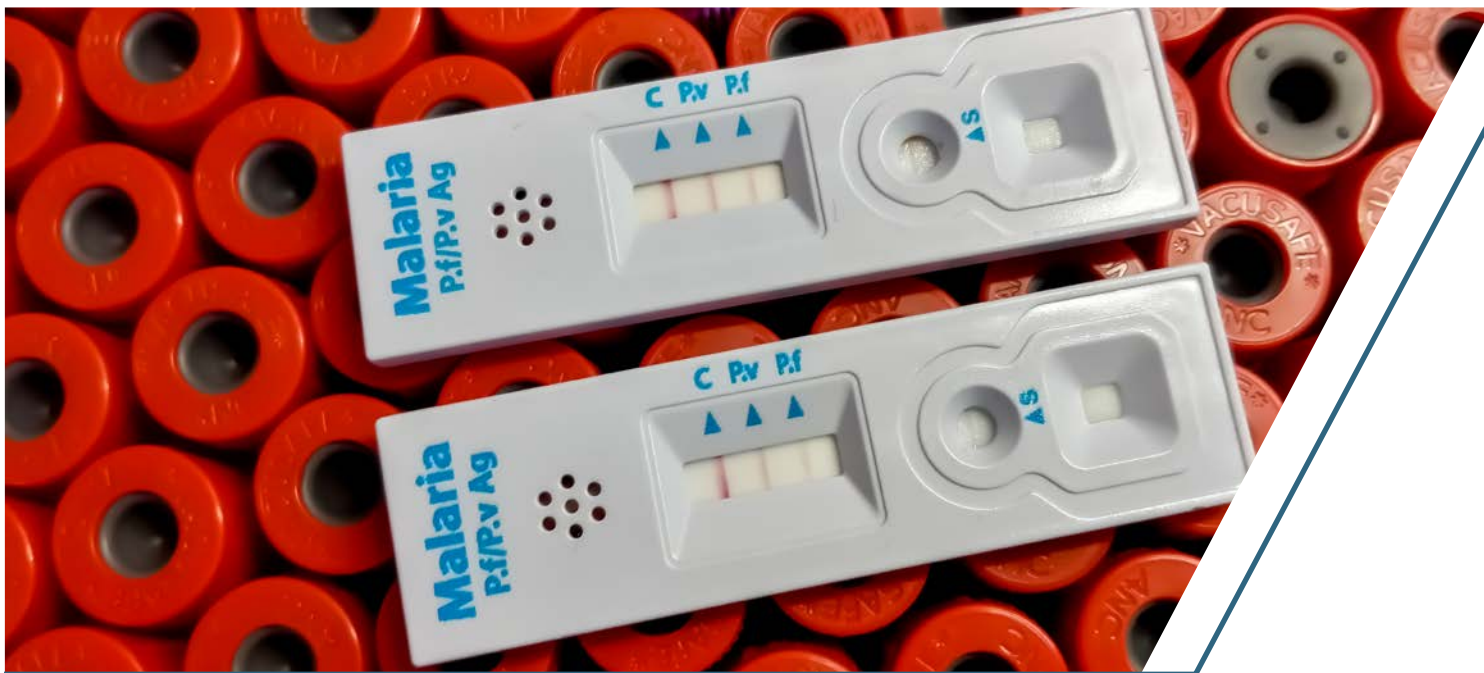

Buying from PFSCM: Global Fund principal recipients place orders through wambo.org.

Finding a Product: PFSCM supplies almost any health product. If you don't find an item you need in the product catalog, then please or contact us directly with your specific product enquiries.

NOTE: Products with duplicate Item Codes have different options or variations such as pack size, color, measurement of other unique characteristics.

Diagnostic Test Kits

This section contains Rapid Diagnostic Test kits (RDTs) and Non-Rapid Diagnostic Test kits for detecting HIV, TB, Malaria, Sexually Transmitted Infections (STIs), Hepatitis, Opportunistic Infections (e.g., Cryptococcus), and other conditions. The RDTs are intended for use in a variety of settings, including laboratories, point-of-care (POC) settings such as clinics, health centers, and hospitals, and in some instances for self-testing. The Non-Rapid Diagnostic Test kits listed in this section include Enzyme-Linked Immunosorbent Assays (ELISAs) and are intended for laboratory use.

Equipment

This section lists medical, laboratory, imaging and waste management equipment. Medical equipment includes thermometers, pulse oximeters, electrocardiographs, sphygmomanometers, infusion pump and syringe pump. Lab instruments listed include electronic and mechanical pipettes while Auxiliary laboratory instruments includes analytical balances, autoclaves, biosafety and laminar flow cabinets, laboratory shakers and rotators, centrifuges, electrophoresis systems, magnetic stands, laboratory and vaccine refrigerators and freezers, incubators, vaccine carriers, microscopes, thermoblocks, thermomixers, water baths. Imaging equipment such as Computed Tomography scanners, different types of X-rays, Ultrasound scanners, and related accessories and consumables are also listed in this section. Additionally, incinerators and waste management autoclaves are included.
