

A Look at PFSCM's Impact on World AIDS Day

PFSCM's mission is to increase access to HIV products by optimizing health supply chains

Since 2020,* we have delivered **4,954 shipments** of HIV prevention, testing, and treatment products worth more than **\$538 million** to clients in over **90 countries**.

*Data: Jan 1, 2020 to Oct 31, 2023.

90% of PFSCM's volumes are destined for **African countries**.

Products include **condoms, antiretrovirals, pre-exposure prophylaxis, HIV rapid diagnostic test kits, including self test kits, viral load and early infant diagnostic products.**

Accessibility challenges in LMICs

A **fragmented wholesaler and distributor landscape, weak regulatory systems, long global supply chains, and poor accessibility** impact the price competitiveness of locally supplied or produced health products.

Local sourcing is an essential procurement strategy for PFSCM, fostering **strong supplier relationships to ensure the availability, affordability and quality of HIV products.**

PFSCM's collaboration with manufacturers

PFSCM collaborates with manufacturers to better understand their **global footprint, pricing structures, and the availability and shelf life** of their products in-country.

This collaboration also **connects countries with suppliers and amplifies the impact on HIV work** through **resilient supply chains**.

Navigating the changing CD4 landscape

The **CD4 diagnostic landscape** is changing, and key testing platforms are being discontinued.

PFSCM is preparing to **ensure service continuity and supporting clients with information** about the changing landscape and **alternative testing products**.

The importance of community involvement

Community involvement is key to the success of HIV programs.

Empowering communities to take ownership of their own health ensures the **sustainability of HIV programs**.

RENEWING OUR COMMITMENT TO ENDING INEQUALITIES, HIV/AIDS, AND EPIDEMICS
